

We are looking for new team members as

DevOps Cloud and Application

Come Join DIGIMONDO – we enable the Internet of Things. For the past 5 years, DIGIMONDO has been inventing innovative software that transform lives and industries. Get hands-on experience working with the brightest minds to solve complex problems that matter: from industry automation, utilities and logistics to smart city to real estate digitization. Enjoy a culture that values aligned goals, balanced work-life priorities, continuous learning throughout your career and shared rewards. At DIGIMONDO, we invest in you and succeed together because we believe that happy, healthy, intellectually-challenged people drive our growth and market leadership.

DIGIMONDO at a Glance

DIGIMONDO enables the Internet of Things by helping customers bridge the physical and digital worlds with unmatched technologies that solve real-life problems and make the world smarter, healthier, greener and safer. With over €1 million in revenue, DIGIMONDO specializes in standard enterprise software for sensor networks. We make our customers independent of technologies and manufacturers while being uncompromising in terms of data security.

Our teams are multicultural, cross-functional and self-organized. At DIGIMONDO's R&D team we live the agile philosophy. Our tech journey has taken us to process millions of transactions every day, in a low latency, high volume environment. As we continue to learn and grow, we are passionate about writing clean, maintainable code in scalable systems in the cloud and being the pioneers of innovation in our sector.

For our main Technology location in **Hamburg (Germany)** we are on the hunt for self-driven individuals who want to join us because they like being challenged and love to work in a highly collaborative environment.
